

HELLO I'M

MICHAEL LANGE

MACHINE LEARNING ENGINEER

A LITTLE BACKGROUND

I'VE HAD THE OPPORTUNITY TO WORK AS A SOFTWARE ENGINEER FOR THE **LAST 24 YEARS UTILIZING A WIDE RANGE OF TECHNOLOGY WITHIN MANY INDUSTRIES.**

As an example, some include FinTech, medicine, education and entrepreneurial initiatives. Consequently, I have exposure within many facets in our field.

I love to learn new things deeply, and have learned to do so very quickly. I pride myself on my ability to dive into a new tech head first, and build commercial products.

Just like I did when I started building cutting edge commercial web apps in 1996, today my passion is to continuously contribute to the cutting edge development of AI/ML using all the skills I have. And, skills yet to learn.

EDUCATION

WHAT AM I LOOKING FOR?

I'M A SCIENTIST AT HEART, AND AN EXPERIMENTER BY NATURE.

My dream position is a long term career in the field of Machine Learning and Artificial Intelligence in a mid-level role in which I can learn from senior ML engineers.

I thrive in an environment that is open to all communication, and collaboration of ideas without ego. I love pair programming, even over zoom, especially over zoom.

I like working with people who genuinely want to deliver quality products on-time, yet are not afraid of pushing the boundaries of technology. And of course, we have to laugh as much as possible.
